

Environment policy

Skånemejerier strives to best serve a sustainable environment in providing safe, market-leading foods. Our pursuit of sustainable development includes a constant reduction of our environmental impact.

Skånemejerier will ensure the following for a good environment:

1. Minimizing emissions and discharges of environment polluting substances in compliance with the applicable regulations.
2. Resource Management and ecocycling.
3. Compliance with related laws, regulations and binding requirements.
4. Ensure all employees' environmental competence and responsibility.
5. Continuous improvement of the environmental performance of the business.
6. The Environmental work shall be systematically and continuously developed and secured using the management system.

We do this by:

1. Sustainable development is based on Skånemejerier's organization.
2. Skånemejerier's focus on sustainable development contributes to meeting our stakeholders' demands.
3. Skånemejerier employees are responsible for following our Code of Conduct and performing their work according to established routines and requirements to meet environmental goals.
4. Constantly measure, monitor and improve our environmental performance.
5. The company's goals lead to increased environmental awareness and reduced environmental impact in our operations.
6. A secured management system with clear processes and procedures.

The present environmental policy is a part of the long term commitment of Skånemejerier with sustainable development. All the employees in our different facilities will be committed to achieve these ambitious goals to make Skånemejerier the most sustainable dairy company in Sweden.
